## 1 Summary

*Archaeological monitoring and recording was carried out at 1 Alton Drive, Colchester, Essex during groundworks for the construction of front and rear extensions. Despite being located in an area of known Roman burials, no significant archaeological features or horizons were exposed.*

## 2 Introduction (Fig 1)

This report presents the results of archaeological monitoring and recording at 1 Alton Drive, Colchester, Essex which was carried out between 1st-5th December 2016. The work was commissioned by Ross Carroll in advance of the construction of front and rear extensions, and was undertaken by Colchester Archaeological Trust (CAT).

In response to consultation with Colchester Borough Council Planning Services (CBCPS), the Colchester Borough Council Archaeological Advisor Jess Tipper advised that in order to establish the archaeological implications of this application, the applicant should be required to commission a scheme of archaeological investigation in accordance with paragraphs 128, 129 and 132 of the *National Planning Policy Framework* (DCLG 2012).

All archaeological work was carried out in accordance with a *Brief for Continuous Archaeological Recording*, detailing the required archaeological work, written by Jess Tipper (CBCPS 2015), and a written scheme of investigation (WSI) prepared by CAT in response to the brief and agreed with CBCPS (CAT 2015).

In addition to the brief and WSI, all fieldwork and reporting was done in accordance with English Heritage's *Management of Research Projects in the Historic Environment (MoRPHE)* (English Heritage 2006), and with *Standards for field archaeology in the East of England* (EAA 14 and 24). This report mirrors standards and practices contained in the Institute for Archaeologists' *Standard and guidance for archaeological watching brief* (ClfA 2014a) and *Standard and guidance for the collection, documentation, conservation and research of archaeological materials* (ClfA 2014b).

## 3 Archaeological background

The following archaeological background draws on the major published sources for Colchester archaeology (listed below), and also on the Colchester Historic Environment Record (CHER) and the Essex Historic Environment Record (EHER).

The development site is located in an area rich in archaeological remains. It lies within the Late Iron Age *oppidum* of Camulodunum, which was defined by a system of defensive dykes. One of these, Lexden Dyke, extends roughly north-south through Lexden Park 380m west of the development site (CAR 11, 34-45).

It is also situated towards the east of the Lexden cemetery (CAR 6, 281; CAR 11, 164-169). The core of the cemetery, measuring around 75m across with at least 27 cremation burials, lies approximately 200m west/southwest on St Clare Road and is of a Late Iron Age date (*ibid*). Later burials, 1st century BC to the 3rd century AD, were then more widely scattered throughout the area of St Clare Road, Fitzwalter Road and to the south of Lexden Road (CAR 11, 164-9).

Approximately 250m to the southwest lies the Lexden Tumulus, an Iron Age barrow excavated in 1924 which produced a rich Belgic burial with the remains of funerary bronzes, gold and silver objects and a coin with the head of Augustus mounted as a medallion. Various pottery finds date the burial (a cremation) to just before the Roman conquest. The burial mound has variably thought to be that of *Addedomarus* (CAR 11, 85-94, Foster 1986) or Tasciovanus (Philip Crummy, pers comm).

CAT has undertaken a number of other fieldwork projects in the adjacent St Clare Road and Fitzwalter Road in recent years, most of them revealed no significant archaeological horizons (CAT Report 99, 136, 195, 225, 250, 258, 267, 334, 455, 568, 1004). However, two Roman urned cremation burials were identified during a watching brief at 12 St Clare Road (CAT Report 582). Excavation at 20 St Clare Road revealed a post-medieval boundary ditch and post-medieval/modern pits (CAT Report 832), and a watching brief at 1 St Clare Road earlier this year revealed two early Roman pits, a post-medieval pit and a modern pit (CAT Report 959). Also carried out this year, evaluation and excavation at 19 St Clare Road (CAT Report 958 and 1009) revealed four Roman ditches, a pit and a possible grave and excavation and monitoring at High Trees, St Clare Drive (CAT Report 1008) revealed Roman ditches, pits and postholes representing a largely agricultural landscape.

#### 4 Results (Figs 2-3)

All groundworks were carried out by the contractor under archaeological supervision. No significant archaeological features or finds were exposed.

##### Front extension

The foundation trenches for the extension measured 7.5m long by 0.5m wide and 1m deep. The trenches were excavated through modern topsoil (L1, c 0.17-0.2m thick) and a dark yellow/brown loamy sandy-silt subsoil (L2, c 0.3m thick) onto natural sand (L3). A modern service trench was identified.

An additional drainage trench was excavated measuring 7.2m long, 0.5m wide and 0.65m deep. It was excavated through the driveway (c 0.3m thick rubble) onto L2.

##### Rear extension

The foundation trenches for the extension measured 9.5m long by 0.5m wide and 1m deep. The trenches were excavated through cement for paving slabs (c 0.1m thick) onto modern topsoil (L1, c 0.1m thick) and a dark yellow/brown loamy sandy-silt subsoil (L2, c 0.3-0.4m thick) which sealed natural sands (L3).

Photographs 1-2 Foundation trench, looking SE and drainage trench, looking NE

## 5 Finds

There were no archaeological finds.

## 6 Discussion

Despite being located in an area of archaeological importance, no significant archaeological features or horizons were exposed during groundworks.

## 7 Acknowledgements

CAT thanks Ross Carroll for commissioning and funding the work. The project was managed by C Lister and carried out by N Rayner. Figures were prepared by L Pooley and E Holloway. The project was monitored for CBCPS by Jess Tipper.

## Site location and description

The development site is located 2.2km to the WSW of Colchester town centre at 1 Alton Drive, Colchester, Essex (Fig 1). Site centre is National Grid Reference TL 9857 2410.

## Proposed work

Proposed work comprises the construction of front and rear extensions.

## Archaeological background

The following archaeological background draws on the major published sources for Colchester archaeology (listed below), and also on the Colchester Historic Environment Record (CHER) and the Essex Historic Environment Record (EHER).

The development site is located in an area rich in archaeological remains. It lies within the Late Iron Age *oppidum* of Camulodunum, which was defined by a system of defensive dykes. One of these, Lexden Dyke, extends roughly north-south through Lexden Park 380m west of the development site (CAR 11, 34-45).

It is also situated towards the east of the Lexden cemetery (CAR 6, 281; CAR 11, 164-169). The core of the cemetery, measuring around 75m across with at least 27 cremation burials, lies approximately 200m west/southwest on St Clare Road and is of a Late Iron Age date (*ibid*). Later burials, 1st century BC to the 3rd century AD, were then more widely scattered throughout the area of St Clare Road, Fitzwalter Road and to the south of Lexden Road (CAR 11, 164-9).

Approximately 250m to the southwest lies the Lexden Tumulus, an Iron Age barrow excavated in 1924 which produced a rich Belgic burial with the remains of funerary bronzes, gold and silver objects and a coin with the head of Augustus mounted as a medallion. Various pottery finds date the burial (a cremation) to just before the Roman conquest. The burial mound has variably thought to be that of *Addedomarus* (CAR 11, 85-94, Foster 1986) or *Tasciovanus* (Philip Crummy, pers comm).

CAT has undertaken a number of other fieldwork projects in the adjacent St Clare Road and Fitzwalter Road in recent years, most of them revealed no significant archaeological horizons (CAT Report 99, 136, 195, 225, 250, 258, 267, 334, 455, 568, 1004). However, two Roman urned cremation burials were identified during a watching brief at 12 St Clare Road (CAT Report 582). Excavation at 20 St Clare Road revealed a post-medieval boundary ditch and post-medieval/modern pits (CAT Report 832), and a watching brief at 1 St Clare Road earlier this year revealed two early Roman pits, a post-medieval pit and a modern pit (CAT Report 959). Also carried out this year, evaluation and excavation at 19 St Clare Road (CAT Report 958 and 1009) revealed four Roman ditches, a pit and a possible grave and excavation and monitoring at High Trees, St Clare Drive (CAT Report 1008) revealed Roman ditches, pits and postholes representing a largely agricultural landscape.

## Planning background

A planning application was made to Colchester Borough Council in January 2016 (application no. 160094) proposing the construction of front and rear extensions.

As the site lies within a scheduled monument and is an area highlighted by the EHER / CHER as having a high potential for archaeological deposits, an archaeological condition was recommended by the Colchester Borough Council Archaeological Advisor (CBCAA). The recommended archaeological condition is based on the guidance given in the *National Planning Policy Framework* (DCLG 2012).

## Requirement for work

The required archaeological work is for continuous archaeological monitoring and recording of all groundworks. Details are given in a Project Brief written by CBCAA (CBC 2016).

Specifically:

The monitoring and recording is being undertaken to identify and record any surviving archaeological deposits that may exist on site.

If unexpected remains are encountered the CBCAA will be informed immediately. Amendments to the brief may be required to ensure adequate provision for archaeological recording. This could include the need for archaeological excavation of parts of the site which would otherwise be damaged or destroyed.

## **General methodology**

All work carried out by CAT will be in accordance with:

- professional standards of the Chartered Institute for Archaeologists, including its *Code of Conduct* (CIfA 2014a, b)
- Standards and Frameworks published by East Anglian Archaeology (Gurney 2003, Medlycott 2011)
- relevant Health & Safety guidelines and requirements (CAT 2014)
- the Project Briefs issued by the CBCAA (CBC 2016).

Professional CAT field archaeologists will undertake all specified archaeological work, for which they will be suitably experienced and qualified.

Notification of the supervisor/project manager's name and the start date for the project will be provided to CBCAA one week before start of work.

Unless it is the responsibility of other site contractors, CAT will study mains service locations and avoid damage to these.

At the start of work (immediately before fieldwork commences) an OASIS online record <http://ads.ahds.ac.uk/project/oasis/> will be initiated and key fields completed on Details, Location and Creators forms. At the end of the project all parts of the OASIS online form will be completed for submission to EHER. This will include an uploaded .PDF version of the entire report.

A project or site code will be sought from the curating museum. This code will be used to identify the project archive when it is deposited at the curating museum.

## **Staffing**

The number of field staff for this project is estimated as follows: One CAT officer for the duration of the groundworks.

## **Monitoring methodology**

There will be sufficient on-site attendance by CAT staff to maintain a watch on all contractors' ground works to record, excavate or sample (as necessary) any archaeological features or deposits.

All topsoil removal and ground reduction will be done with a toothless bucket.

If archaeological features or deposits are uncovered, time will be allowed for these to be planned and recorded.

If any features or deposits uncovered are to be destroyed by the proposed development, time will be allowed for these features to be excavated by hand. This includes a 50% sample of discrete features (pits, etc) and 10% of linear features (ditches, etc).

Fast hand-excavation techniques involving (for instance) picks, forks and mattocks will not be used on complex stratigraphy.

A metal detector will be used to examine spoil heaps, and the finds recovered.

Individual records of excavated contexts, layers, features or deposits will be entered on pro-forma record sheets. Registers will be compiled of finds, small finds and soil samples.

All features and layers or other significant deposits will be planned, and their profiles or sections recorded. The normal scale will be site plans at 1:20 and sections at 1:10, unless circumstances indicate that other scales would be appropriate.

### **Site surveying**

Normal scale for archaeological site plans and sections is 1:20 and 1:10 respectively, unless circumstances indicate that other scales would be more appropriate.

The site grid will be tied into the National Grid. Corners of excavation areas and trenches will be located by NGR coordinates.

### **Environmental sampling policy**

CAT has an arrangement with Val Fryer/Lisa Gray whereby any potentially rich environmental layers or features will be appropriately sampled as a matter of course, but only if they are datable. CAT staff will process samples and the flots sent to Val Fryer/Lisa Gray for reporting. If any complex or outstanding deposits are encountered, VF/LG will be asked onto site to advise. EH Regional Adviser is available for further advice.

### **Human remains**

CAT follows the policy of leaving human remains *in situ* unless there is a clear indication that the remains are in danger of being compromised as a result of their exposure. If circumstances indicated it were prudent or necessary to remove remains from the site during the monitoring, the following criteria would be applied; if it is clear from their position, context, depth, or other factors that the remains are ancient, then normal procedure is to apply to the Department of Justice for a licence to remove them. In that case, conditions laid down by the licence will be followed. If it seems that the remains are not ancient, then the coroner, the client, and CBCAA will be informed, and any advice and/or instruction from the coroner will be followed.

### **Photographic record**

Will include both general and feature-specific photographs, the latter with scale and north arrow. A photo register giving context number, details, and direction of shot will be prepared on site, and included in site archive.

### **Finds**

All significant finds will be retained.

All finds, where appropriate, will be washed and marked with site code and context number.

Stephen Benfield (CAT) normally writes our finds reports. Some categories of finds are automatically referred to other CAT specialists:

animal bones (small groups): Pip Parmenter

flints: Adam Wightman

or to outside specialists:

small finds, metalwork, coins, etc: Pip Parmenter

animal bones (large groups) and human remains: Julie Curl (*Sylvanus*)

environmental processing and reporting: Val Fryer / Lisa Gray

conservation of finds: staff at Colchester Museum

Other specialists whose opinion can be sought on large or complex groups include:

Roman brick/tile: Ernest Black

Roman glass: Hilary Cool

Prehistoric pottery: Paul Sealey

Other: EH Regional Adviser in Archaeological Science (East of England).

All finds of potential treasure will be removed to a safe place, and the coroner informed immediately, in accordance with the rules of the Treasure Act 1996. The definition of treasure is given in pages 3-5 of the Code of Practice of the above act. This refers primarily to gold or silver objects.

Requirements for conservation and storage of finds will be agreed with the appropriate museum prior to the start of work, and confirmed to CBCAA.

## **Results**

Notification will be given to CBCAA when the fieldwork has been completed.

An appropriate archive will be prepared to minimum acceptable standards outlined in *Management of Research Projects in the Historic Environment* (English Heritage 2006).

The report will be submitted within 6 months of the end of fieldwork, with a copy supplied to CBCAA as a PDF.

The report will contain:

- Location plan of groundworks. At least two corners of which will be given 10 figure grid references.
- Section/s drawings showing depth of deposits from present ground level with Ordnance Datum, vertical and horizontal scale.
- Archaeological methodology and detailed results including a suitable conclusion and discussion and results referring to Regional Research Frameworks (Medlycott 2011).
- All specialist reports or assessments
- A concise non-technical summary of the project results.

An EHER summary sheet will also be completed within four weeks and supplied to CBCAA.

Results will be published, to at least a summary level (i.e. round-up in *Essex Archaeology & History*) in the year following the archaeological field work. An allowance will be made in the project costs for the report to be published in an adequately peer reviewed journal or monograph series

## **Archive deposition**

It is a policy of Colchester Borough Council that the integrity of the site archive be maintained (i.e. all finds and records should be properly curated by a single organisation), with the archive available for public consultation. To achieve this desired aim it is assumed that the full archive will be deposited in Colchester Museums *unless otherwise agreed in advance*. (A full copy of the archive shall in any case be deposited).

**By accepting this WSI, the client agrees to deposit the archive, including all artefacts, at Colchester & Ipswich Museum.**

The requirements for archive storage will be agreed with the curating museum.

If the finds are to remain with the landowner, a full copy of the archive will be housed with the curating museum.

The archive will be deposited with Colchester & Ipswich Museum within 3 months of the completion of the final publication report, with a summary of the contents of the archive supplied to CBCAA.

## **Monitoring**

CBCAA will be responsible for monitoring progress and standards throughout the project, and will be kept regularly informed during fieldwork, post-excavation and publication stages.

Notification of the start of work will be given to CBCAA one week in advance of its commencement.

Any variations in this WSI will be agreed with CBCAA prior to them being carried out.

CBCAA will be notified when the fieldwork is complete.

The involvement of CBCAA shall be acknowledged in any report or publication generated by this project.

Previous/future work	No / Not known
Any associated project reference codes	16/11j - Contracting Unit No.
Any associated project reference codes	160094 - Planning Application No.
Any associated project reference codes	COLEM: 2016.117 - Museum accession ID
Any associated project reference codes	ECC3902 - HER event no.
Type of project	Recording project
Site status	None
Current Land use	Residential 1 - General Residential
Monument type	N/A None
Significant Finds	N/A None
Investigation type	"Watching Brief"
Prompt	Planning condition

### Project location

Country	England
Site location	ESSEX COLCHESTER COLCHESTER 1 Alton Drive
Postcode	CO3 3ST
Study area	0.05 Square metres
Site coordinates	TL 9857 2410 51.879528283978 0.885311693453 51 52 46 N 000 53 07 E Point

### Project creators

Name of Organisation	Colchester Archaeological Trust
Project brief originator	CBC Archaeological Officer
Project design originator	Laura Pooley
Project director/manager	Chris Lister
Project supervisor	Nigel Rayner
Type of sponsor/funding body	Owner

### Project archives

Physical Archive Exists?	No
Digital Archive recipient	Colchester Museum
Digital Archive ID	COLEM: 2016.117
Digital Contents	"none"
Digital Media available	"Images raster / digital photography", "Survey"
Paper Archive recipient	Colchester Museum
Paper Archive ID	COLEM: 2016.117
Paper Contents	"none"
Paper Media available	"Miscellaneous Material", "Photograph", "Plan", "Report", "Section"

### Project bibliography 1

Publication type	Grey literature (unpublished document/manuscript)
Title	Archaeological monitoring and recording at 1 Alton Drive, Colchester, Essex, CO3 3ST: December 2016
Author(s)/Editor(s)	Pooley, L.
